

THE ZERO BEAT

HAZEL PARK AMATEUR RADIO CLUB

FEBRUARY MEETING

Weather permitting, the February meeting will be held on Wed. February 10, 7.30pm at the Hoover School, located at the corner of Hughes and Tucker Streets in Hazel Park.

This month's program will feature the ARRL Mich. Section Manager Dale Williams WA8EFK.

So if you get a chance, come on down and find out what happened to all the donuts when last month's meeting was canceled.

CLUB OFFICERS

The 1992/93 Hazel Park Amateur Radio Club Officers:

- WD8S-Mike VanBuren, President
- NR8D-Frank McBride, Vice President
- KF8AB-John Hanfland, Treasurer
- KE8QT-Jim Bunting, Secretary
- WD8SCX-John Stahl, Parliamentarian
- WB8ATZ-Bob Ling Board

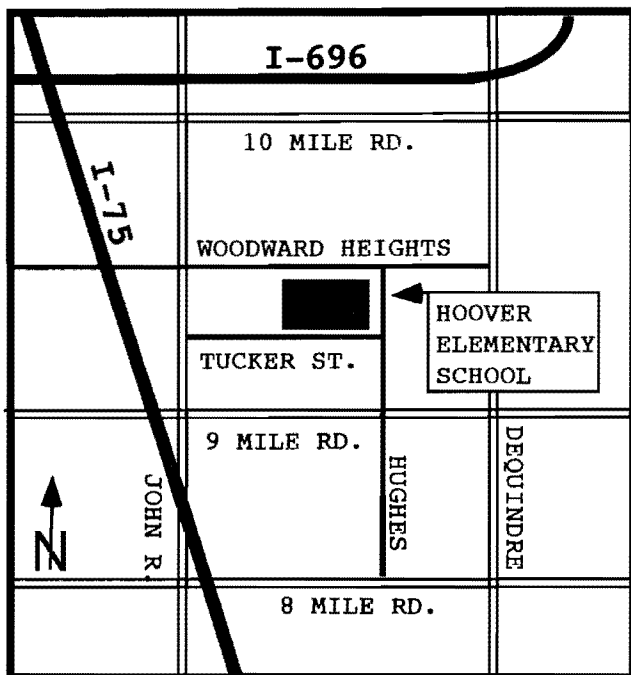

A.B.C. DON BRAND

NOVICE CLASSES

Novice classes are scheduled to begin Thursday February 4, 7pm at Hoover School, with the CW portion of the classes starting the following week.

Also beginning with the February 11 class, will be an intermediate CW course to prepare for the 13wpm general class exam. The only requirement for the intermediate course is that you know the code at 5wpm.

So you have no excuse. Hope to see you there!

FCC NEWS

FCC RULES

The FCC has adopted new rules to facilitate the introduction of sophisticated new home automation and communications systems. These systems use a variety of distribution techniques including the use of the home electrical wiring to distribute radio frequency (RF) signals that control or monitor appliances and other electrical devices ("carrier current") and cables to distribute radio and television signals ("master antennas").

The ARRL and others suggested that the FCC adopt RF susceptibility standards for consumer electronic equipment including home automation and communication equipment. The Commission said that it was aware that industry was addressing RF susceptibility through development and implementation of voluntary standards. "We continue to support such initiatives and find no basis to pursue mandatory requirements at this time. Further, susceptibility standards are beyond the scope of this proceeding."

FCC DEFICIT

The FCC may contend with as much as a \$20 million deficit for the next fiscal year. Look for 7 to 14 furlough days where the Commission could be closed in light of its budget.

PROBATION

A technician class amateur has been sentenced to three years supervised probation and 250 hours of community service for transmitting on a tactical operation channel of the San Diego Police Department. 22-year-old Roy L. Eyman, KC6TYR, also was ordered to deprogram his amateur radio equipment of all public safety frequencies, according to an FCC press release.

The FCC's San Diego office said that on September 16, 1991, Eyman was transmitting music on a San Diego Police Department tactical operations channel. At the time a police sergeant who is also an amateur radio operator heard the interference and used a hand-held transceiver to direction-find the source of the interfering signal, the FCC said. The officer heard the music over his amateur radio hand-held unit as well as hearing it orally originating from Mr. Eyman's vehicle, the FCC said. The sergeant then seized Mr. Eyman's amateur radio equipment.

The maximum penalty for unlicensed operation in a first conviction is a fine of up to 100,000 dollars or imprisonment of up to one year, or both. The sentence was handed down by a U.S. Magistrate in an out-of-court settlement, the FCC said.
